

To all of you who are less than 18 years old

CAMPAIGN TO PREVENT CHILD ABUSE IN EDOGAWA

Call for ideas for realizing an abuse-free 'child friendly town'

We seek your cooperation with the following questionnaire.

This January, a 7 year old boy who lived in our town suffered abuse by his parents and died. Last September, he told a dentist that he was being ill-treated. We are shocked that his life could not be saved even though adults at the school and the child support center knew of the problem and talked about it with the parents.

So that his death not be in vain, we feel that we must change society so that children's voices are respected and their wishes are given proper attention. And we feel that matters concerning children should not be decided by adults only.

Please let us know your thoughts and insights about these issues and how you felt after hearing about this incident. It's O.K. to share just a few words. A full answer is not necessary. We believe that children can provide valuable insights on how to solve this problem.

Please tell us your ideas for building a better community where children can live in peace, grow, feel safe, and participate actively.

Thank you in advance for your cooperation.

**Question 1: When you are troubled, who do you go to for advice?
(If there is no one, please say so)**

Question 2: If there is a child who you suspect is being abused, what do you think you can do for the child?

Question 3: What needs to be done so that you and your friends can feel happy in your community?

◎Please feel free to write down any other opinions or ideas.
